# Offshore wind POWERing the North Sea Region

## First announcement

### The POWER Conference

#### **POWER - Pushing Offshore Wind Energy Regions** *The North Sea competence network for offshore wind energy*

Offshore wind energy projects in the North Sea are happening. The POWER competence network is helping to strengthen the leading role of the North Sea Region and its regional supply chains in this rapidly evolving market.

The POWER Conference in summer 2007 in Bremerhaven will showcase the achievements of the network over the last three years, and provide a North Sea perspective on key issues of offshore wind energy, with a focus on:

- Good practise in planning and developing offshore wind farms
- Towards a North Sea wide supply chain
- Skills development and qualification needs for the sector
- Case studies from leading offshore wind regions in the North Sea area

This conference presents a great opportunity for public sector decision makers, experts and stakeholders to network, exchange knowledge and discuss opportunities and challenges in the North Sea Region now and in the future.

We look forward to seeing you in June 2007.

On behalf of the organisers,

Dr. Mathias Grabs,  
POWER Project Manager

**14. – 15. June 2007**
