

Cooperation on supply chain / economic issues

Objective

Through POWER, globally leading offshore wind energy regions are cooperating on offshore wind supply chain issues. Together, these regions can offer full capabilities through the whole of the offshore wind supply chain.

POWER is gathering additional knowledge about the offshore wind supply chain in the Southern North Sea Region, and establishes strong networks between leading offshore wind support organisations and businesses of the sector.

Within this work stream following achievements were realised:

[Business Networking](#)

[Supply Chain Studies](#)

[Energy Industry Classification](#)
